DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5, drawn to a method of generating and transmitting data packets, with signaling for request, transmission and change of source addressing, classified in class 370, subclass 229.
 - II. Claims 6-11, drawn to a refetch logic scheme with data ports, bus and control lines generating and propagating data packets between the various ports, classified in class 370, subclass 469.

The above inventions are separate, distinct, and independent. Neither requires other for its implementation, they have separate statuses in the art as shown by their different classification. Each invention, if allowable would be capable of supporting a separate patent. Therefore, restriction for examination purposes is proper.
